

EINLADUNG

Kolloquium
Sommersemester 2023

Prof. Dr. Anna Lampei Bucharova

Fachbereich Biologie
Philipps-Universität Marburg

hält am Dienstag, den **11.04.2023**, um 16:15 Uhr, im Biologicum, Max-von-Laue-Str. 13, Campus Riedberg, Hörsaal 1 einen Vortrag über,
„Seeding the future: how to get seed for seed-based ecosystem restoration“

Prof. Dr. A. Lampei Bucharova

Grassland restoration requires large amount of seeds. They can be either collected in the wild, but this needs caution because overharvesting can damage the natural population. Much of the seed is thus propagated in agricultural conditions, yet this can cause unintended selection and evolution towards domestication syndrome. Can this reduce establishment of the restored population?

Einladender: Prof. Dr. J. F. Niek Scheepens
